

FA-300 400THN-Desktop screen printing machine

- The screen stencil will not lift during printing. No need to peel off the screen stencil.
- So save inks (there is no need to peel off the screen stencil so that the ink volatilization will be slow).
- No need to peel off the screen stencil. So not easy to plug the screen.
- No need to peel off the screen stencil. So not easy to stick dust.
- Easy for novice, smooth production.
- The first choice for selecting semi-automatic screen printers.
- The dimension of the printer is small, which is able to place on the desktop directly and easy to transport with economical price.
- Ink scraping process is moved by pneumatic cylinder which is stable and effortless.
- The screen printer is able to be equipped with suction vacuum converter.
- X, Y, Z 3 axis direction and angle of the platform for screen printer can be adjusted.
- Magnetic squeegee clip. With magnetic squeegee clip (patent M390871), the squeegee position can be slided easily and the squeegee can be adjusted and disassemble simply.
- The reciprocating speed of sliding table can be adjusted in order to increase printing productivity. Move left/move right speed adjustment.
- The action time of squeegee and ink return knife can be adjusted in order to increase productivity and printing quality.
- Screw holes on the platform is for easy installation of fixing jig.
